LOCATION & TRACKING FEATURES

Google Maps Integration

Donor selects pickup location via Google Maps picker
Latitude & longitude saved with every food post

Nearby Donation Matching

Show posts within a configurable radius (5–10 km)
Volunteers & NGOs only see nearby donation requests

Live Rider Tracking

Donor sees volunteer's live location once pickup starts
Volunteer gets navigation route to the donor address

Area-Based Search

Donors in a given area are matched with NGOs/volunteers in or near the same area so food reaches recipients before it spoils.
